

TIWA ELEGBELEYE

Senior Full Stack Developer | Cybersecurity-Focused Engineer | Team Lead & Solutions Strategist

elegbeleyetiwa@gmail.com | [LinkedIn](#) | [Portfolio](#) | Canada

EXECUTIVE PROFILE

Senior full stack developer and cybersecurity-aware technology leader with 8+ years of experience building, securing, and optimizing web applications, internal systems, and customer-facing digital platforms. Blend hands-on engineering depth with systems strategy, team leadership, and business alignment across software delivery, architecture planning, website modernization, platform reliability, and technical operations. Recognized for translating complex business goals into scalable solutions, leading cross-functional execution, mentoring teams, and improving performance, security, and growth outcomes in fast-moving environments.

CORE STRENGTHS

Full Stack Development: React, JavaScript, Node.js, Python, PHP, Java, C#, Flutter	System Architecture, Technical Strategy, Business Systems Analysis, Platform Modernization	Cybersecurity Mindset: access control, secure configurations, security testing, reliability improvement
REST APIs, CMS & E-commerce Platforms, WordPress, Shopify Plus, MongoDB	Team Leadership, Mentoring, Project Delivery, Stakeholder Communication	Web Performance, SEO, Debugging, Root-Cause Analysis, Documentation

PROFESSIONAL EXPERIENCE

Senior Development Engineer and Strategist | P23 Labs

Dec 2024 - Present

Georgia, United States

- Lead architecture, design, and delivery of software solutions aligned to business growth, operational efficiency, and system scalability goals.
- Partner with cross-functional stakeholders to define requirements, shape technical roadmaps, and translate business needs into practical system architecture.
- Analyze and optimize workflows, data processes, and software integrations to strengthen reliability, performance, and security across business-critical systems.
- Drive executive-level technical communication, balancing engineering tradeoffs, delivery priorities, and long-term platform health.

Software Engineer / Business System Strategist | P23 Labs

Dec 2023 - Dec 2024

United States

- Designed, developed, and deployed software and systems improvements that supported internal operations and revenue growth objectives.
- Contributed to strategic technology initiatives reported to improve company growth by 50% through stronger business-system alignment and execution.
- Conducted software and integration analysis, provided implementation recommendations, and improved system quality, reliability, and security practices.
- Bridged technical and non-technical teams by clearly communicating recommendations, delivery plans, and adoption guidance.

Digital Marketing Specialist | P23 Labs

May 2023 - Dec

United States

2023

- Executed digital campaigns across search, web, email, and social channels while aligning technical marketing delivery with product and sales goals.
- Improved website content, search visibility, user experience, and product discoverability through SEO, paid campaigns, and ongoing optimization.
- Developed social strategies that supported a reported 30% increase in customer engagement and strengthened brand visibility across platforms.
- Led reporting, competitive analysis, and ROI optimization, bringing data-driven discipline to growth initiatives.

Senior Web Developer / Team Lead | SLR Infrastructure Ltd

Sep 2019 - Jan 2023

United Kingdom

- Led end-to-end website delivery from client discovery and user-requirements analysis through build, debugging, launch, and post-launch support.
- Managed schedules, technical execution, and documentation to keep projects on track while maintaining delivery quality under deadline pressure.
- Led a team of five developers across company projects, coordinated task execution, and upheld coding and delivery standards.
- Built strong client relationships and translated business requirements into responsive, maintainable web solutions.

Full Stack Developer | eHealth4everyone

Dec 2019 - Jan 2021

Remote

- Built and maintained front-end and back-end web applications, including WordPress themes and plug-ins, for user-facing digital products.
- Worked closely with UX/UI stakeholders to deliver intuitive interfaces, resolve defects, and improve usability and customer experience.
- Performed testing, debugging, and root-cause analysis to improve stability, reduce recurring issues, and strengthen software reliability.
- Supported team enablement by learning new frameworks quickly, advising on best-fit solutions, and training users on new software programs.

Senior IT Support / Infrastructure & Security Operations | Magic Bet

Jan 2021 - Jan 2023

Nigeria

- Managed user accounts, asset controls, and network security permissions in line with organizational security policy and operational requirements.
- Handled escalated support issues, upgraded hardware and software, and maintained system performance through regular servicing and testing.
- Recruited, trained, and coordinated IT team members while helping sustain service continuity and stronger security operations.

WordPress Development, IT Support, and Technical Operations Roles | Aspilos Foundation

2017 - 2023

Nigeria / Remote / United States

- Built custom WordPress themes, templates, and plug-ins; optimized performance; implemented SEO practices; and integrated third-party APIs and e-commerce tools.
- Provided IT support across systems administration, diagnostics, end-user troubleshooting, software/hardware upgrades, and compliance-related checks.
- Contributed to field technology, data, reporting, and operational improvement initiatives while strengthening customer support and technical documentation.

TECHNICAL IMPACT

- Led the redesign of a privacy software company website that reportedly contributed to a 25% increase in quarterly sales.

- Supported company growth initiatives at P23 Labs through systems strategy and engineering execution tied to a reported 50% improvement in growth outcomes.
- Improved customer engagement through digital optimization and social strategy, including a reported 30% increase in engagement.
- Helped strengthen software quality, reliability, and security practices, including improvements reported at 70% in adherence to standards and best practices.

TECHNICAL SKILLS

Engineering & Platforms React, JavaScript, Node.js, Python, PHP, Java, C#, Flutter, MongoDB, REST APIs, CMS platforms, WordPress, Shopify Plus, responsive development, plug-in development, theme customization, website modernization, system architecture, debugging, testing, root-cause analysis, performance optimization.	Security, Delivery & Leadership Cybersecurity, access control, user permissions, system security testing, secure configuration, reliability engineering, incident troubleshooting, compliance support, business systems strategy, stakeholder management, team leadership, mentoring, project coordination, documentation, cross-functional collaboration, SEO, conversion optimization, digital growth.
